Healthcare Data Made Actionable

Unlock the Power of Your Data for More Informed Healthcare Decisions

Radius Insights is our innovative data analytics platform that's constantly ingesting new data to stay ahead of the curve with

- Advanced analytics
- Predictive modeling
- Real-time reporting

Revealing new patterns and insights that can help healthcare organizations make informed decisions, deliver better care, and improve patient outcomes.

Plus, we keep your member activation and participation at an all-time high with our Engagement App. We're committed to providing healthcare organizations with the tools they need to thrive in the ever-changing landscape of patient care.

CRITICAL HEALTHCARE INSIGHTS | **PROVIDED**

Better Care Decisions

Optimize your care decisions using advanced analytics, continuous learning, and data modeling.

Radius Insignts helps keep your members on track through increased member activation.

Saving Time & Money

Save time with our seamless integration with your data.

Save money with our predictive model that identifies high cost members in your population so you can optimize resource allocation.

Customized Reporting

Eliminate manual reporting with our on-demand Insights portal.

Get on-demand, in-depth insights into your healthcare data with our dynamic customization reporting built for your needs.

Radius Care

Radius Care Insights Supports Healthcare Organizations:

Health Plans

- Elevate your member's care by being more proactive and patient centered.

- Member centric insights illuminate your member care pathways to create a healthier population.

- Manage costs effectively.

Self-Funded Employers

- Enhance employee well-being by promoting a healthier workforce, reducing absence, and increasing productivity.

- Build a better benefits strategy to attract and retain top talent.

- Optimize healthcare costs without sacrificing quality of care.

Health Systems

- Pioneer excellence in care by making informed decision based on AI-driven insights.

- Tailor treatments and therapies for better patient outcomes.

- Optimize referral networks for more efficient care delivery to achieve in-patient care.

Captives

- Streamline healthcare management by mitigating risk with data backed decision making tools.

- Get the insights you need to make informed decisions and optimize your performance through data transparency.

R Radius Care

Advanced Analytics
Gain a clear line of sight into the healthcare journey of your members with our in-depth analysis.

Risk Modeling
Layer and test different risk models to categorize your population and see how you can create cost savings.

Continuous Learning
Radius Insights continually learns from data to reveal patterns, cost averages, care paths, and more.

Physician Prioritization
Rank physicians based on their opportunity for alignment, volume, service mix and total cost of care.

Seamless Integration
Flexible data integration with seamless connection to various data sources via bi-directional API.

Predictive Diagnoses
Discover population statistics based on conditions, get potential diagnosis predictions to prevent large claims.

Data Modeling
Our state-of-the-art platform has out of the box data modeling & indexing at the cloud logic layer.

Dynamic Customization
No more restrictive static reporting Create custom reports based on findings with your population.
